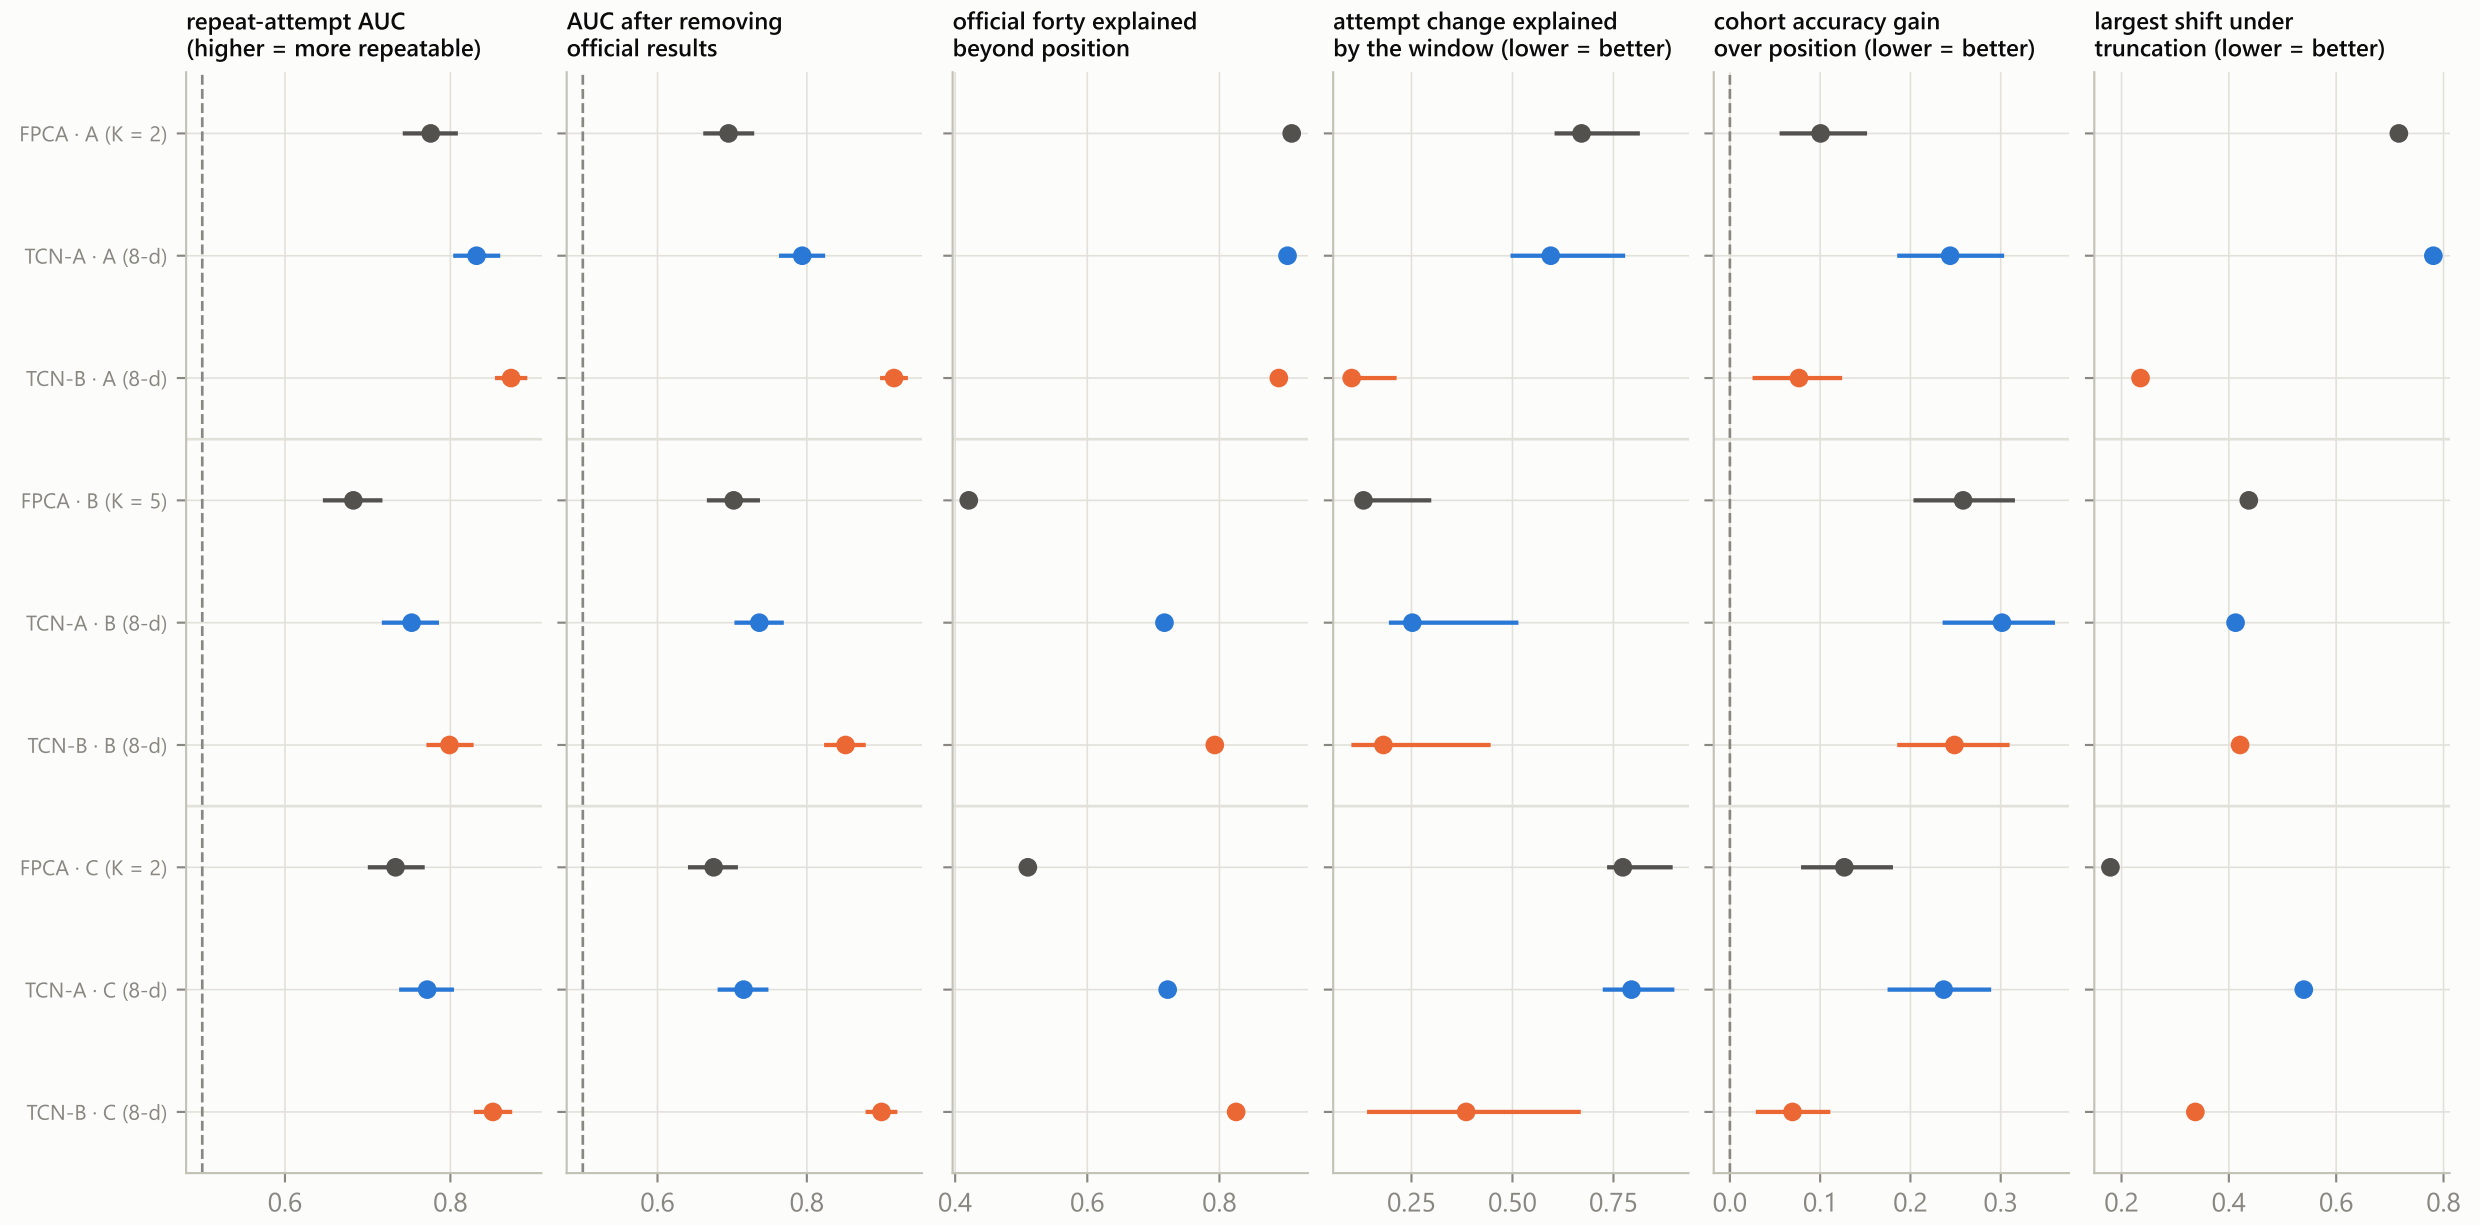
Evidence by method: repeatability, redundancy and nuisance dependence



Unit: confirm-role held-out athlete (n up to 265) for the two AUC panels; all held-out athletes elsewhere. Dot = estimate, bar = 95 % athlete bootstrap where one is computed. Grey = FPCA benchmark of notebook 02, blue = TCN-A, orange = TCN-B. Rule-based reading (for review): TCNA_A: C negative (collapsed) · TCNB_A: A strong positive · TCNA_B: C negative (collapsed) · TCNB_B: C negative (collapsed) · TCNA_C: C negative (collapsed) · TCNB_C: A strong positive.
