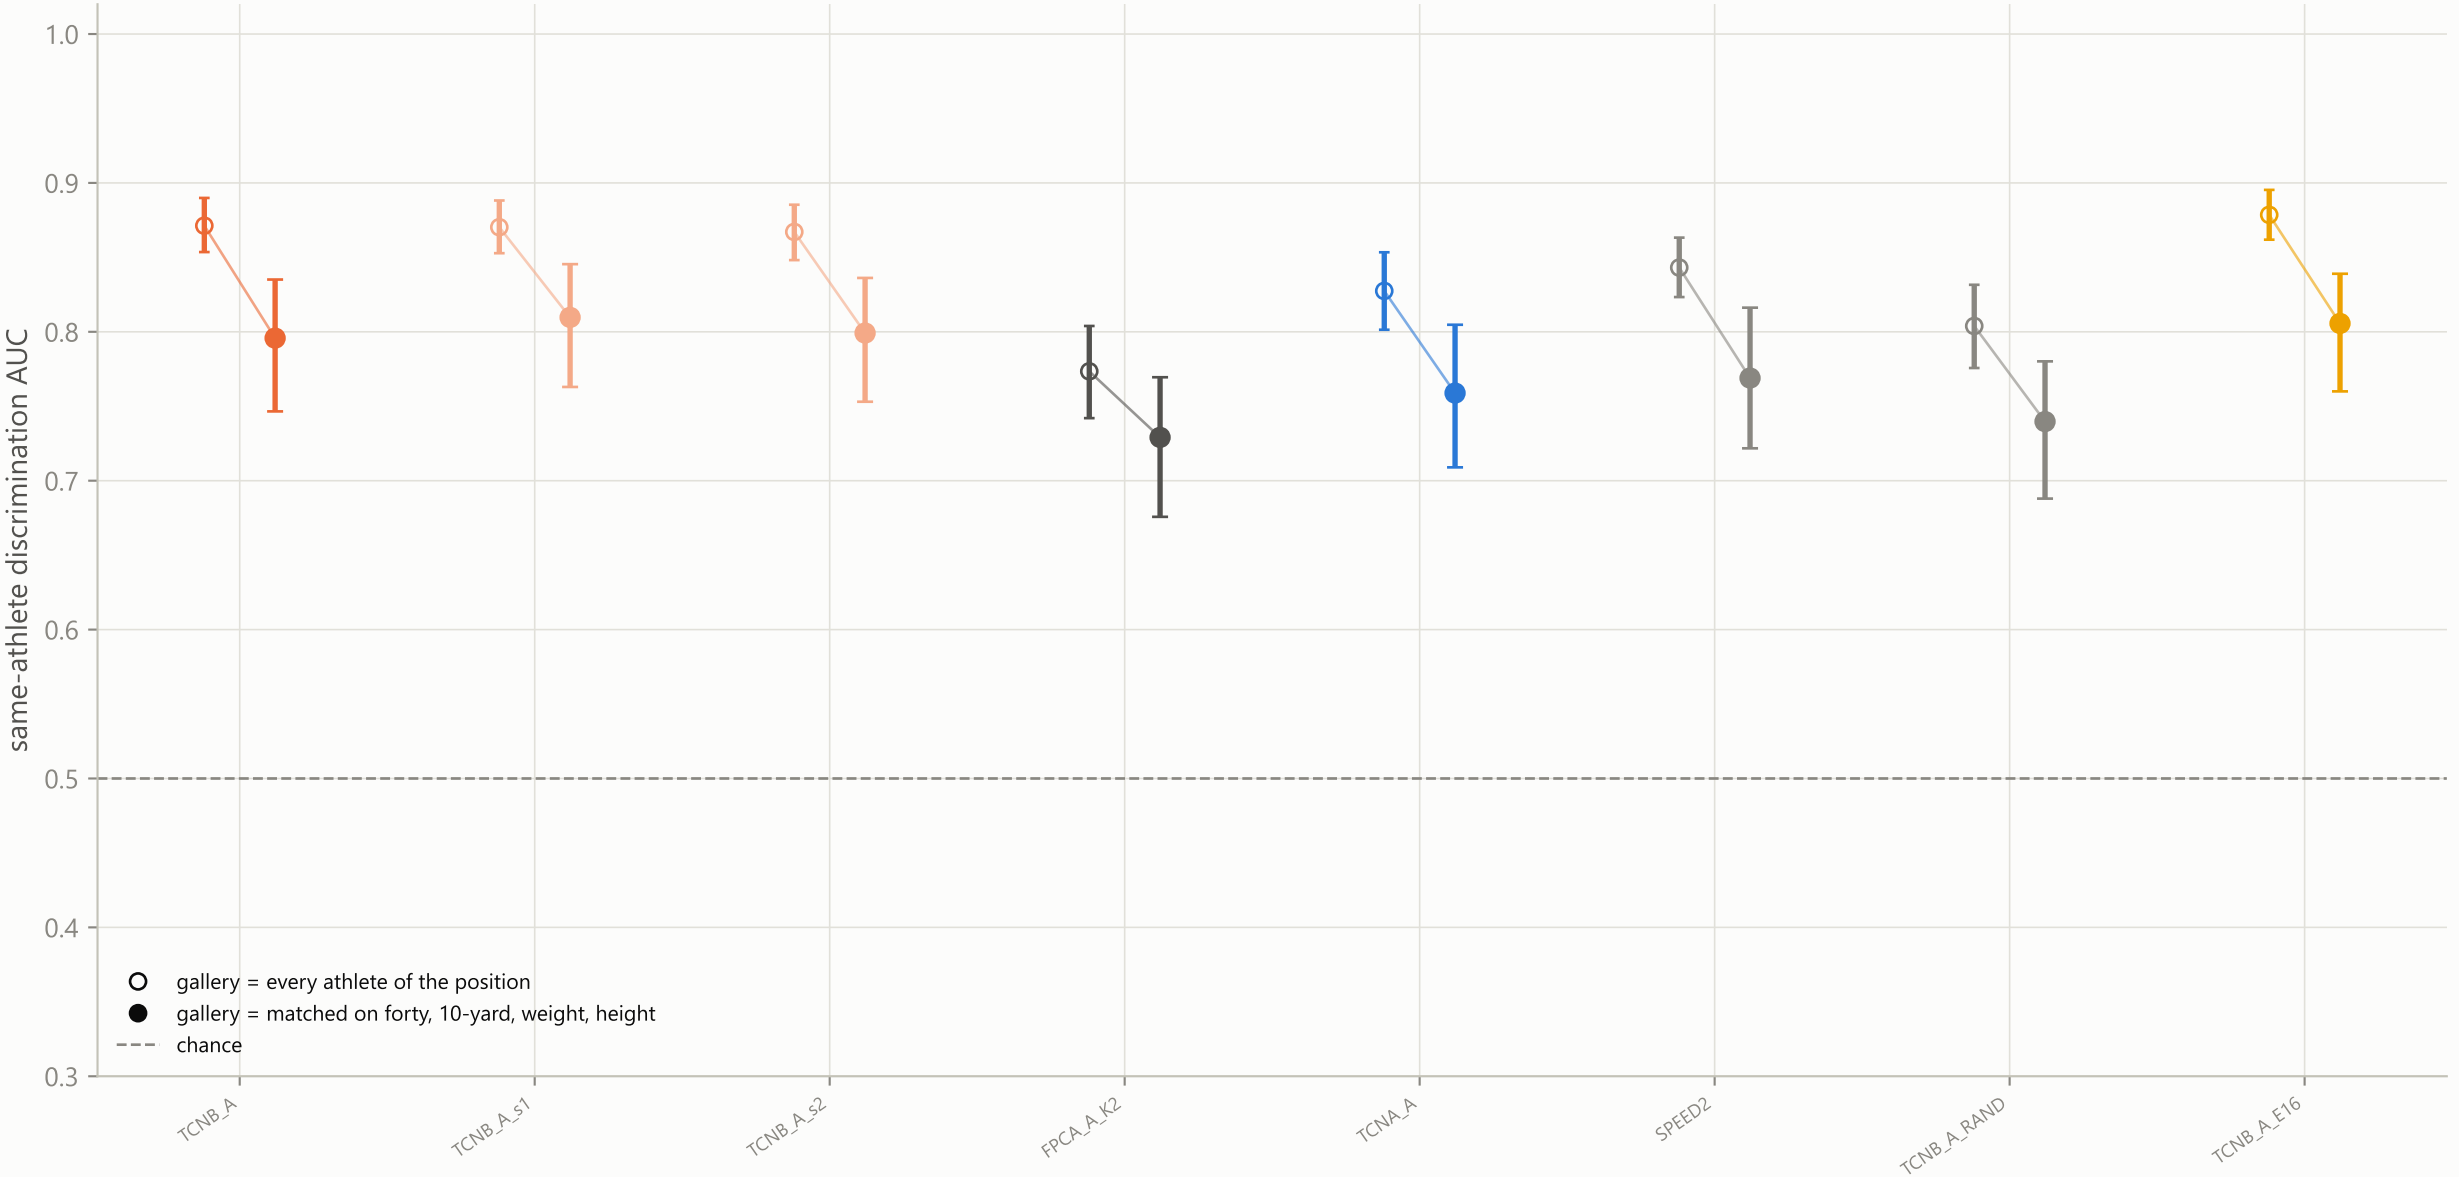
Matched-stopwatch retrieval: same athlete against look-alike impostors



Unit: role:confirm held-out athlete with two embedded attempts and at least one matched impostor (n = 234; 865 query × impostor comparisons from 306 distinct impostors, one athlete serving at most 9 queries). Each pair of dots is the SAME athletes under two galleries, joined by a line. Open: whisker = athlete bootstrap. Filled: whisker = athletes resampled as queries and as impostors together. A representation that only re-encodes the stopwatch and body size falls toward the dashed line when the gallery is matched.
