Supported and unsupported information

stakeholder	item	support	use	do_not_claim
general_manager	official Combine tests	conventional	as today	nothing new
general_manager	NFL predictive value of Combine tracking	not established	none in a draft model	talent rankings, NFL potential scores, bust or sleeper
scout	tracked top speed (p95)	reliable new measured information	the speed the athlete actually reached and held; confirms or the official forty	a football implication of the difference
coach	tracked top speed (p95)	worth a closer look	a measured interval to assess further	a training prescription from an observed difference
scout	speed development 4 → 8 yd/s	reliable new measured information	how quickly speed builds through the middle of the run; sep athletes with the same forty	a football implication of the difference
coach	speed development 4 → 8 yd/s	worth a closer look	a measured interval to assess further	a training prescription from an observed difference
scout	acceleration over 1 s from 4 yd/s	not repeatable	context for the official result only	a football implication of the difference
coach	acceleration over 1 s from 4 yd/s	no separate signal	a measured interval to assess further	a training prescription from an observed difference
scout	speed gain over 10 yd from 4 yd/s	weak additional information	context for the official result only	a football implication of the difference
coach	speed gain over 10 yd from 4 yd/s	worth a closer look	a measured interval to assess further	a training prescription from an observed difference
scout	FPCA speed-curve scores (K = 2)	reliable new measured information	the shape of the whole speed curve in two numbers	a football implication of the difference
coach	FPCA speed-curve scores (K = 2)	worth a closer look	a measured interval to assess further	a training prescription from an observed difference
scout	TCN-B movement fingerprint (8-d)	reliable new measured information	which athletes MOVE alike; a similarity search among prospe	a football implication of the difference
coach	TCN-B movement fingerprint (8-d)	worth a closer look	a measured interval to assess further	a training prescription from an observed difference

Information support for scouts, coaches and general managers. It has not been shown to improve a draft decision. Football-outcome evidence: no added value established.
