Example recorded movement sequences

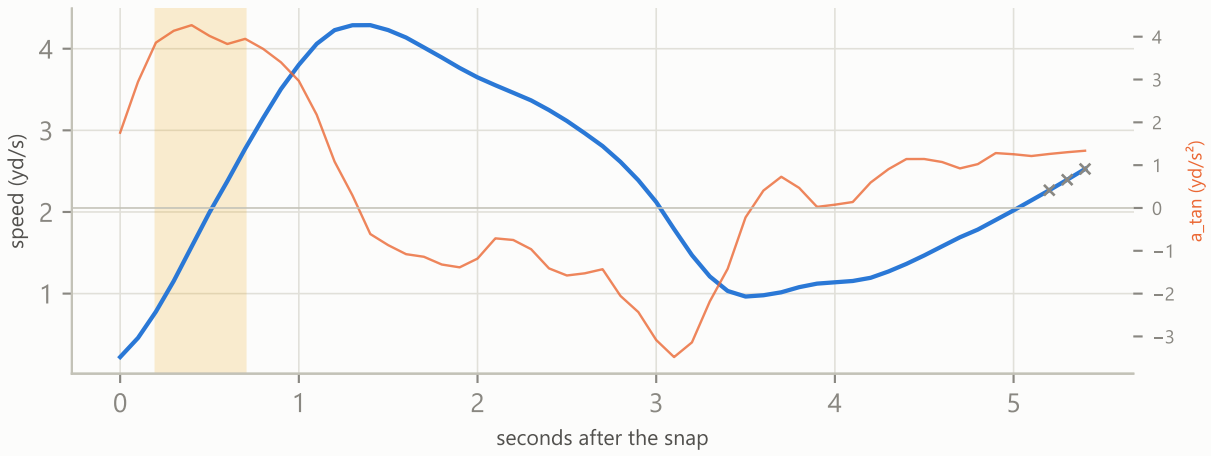

Riley Moss · DB · game 2025100506, play 170
1.0 s sustained speed 5.23 yd/s (p50 of DB windows)

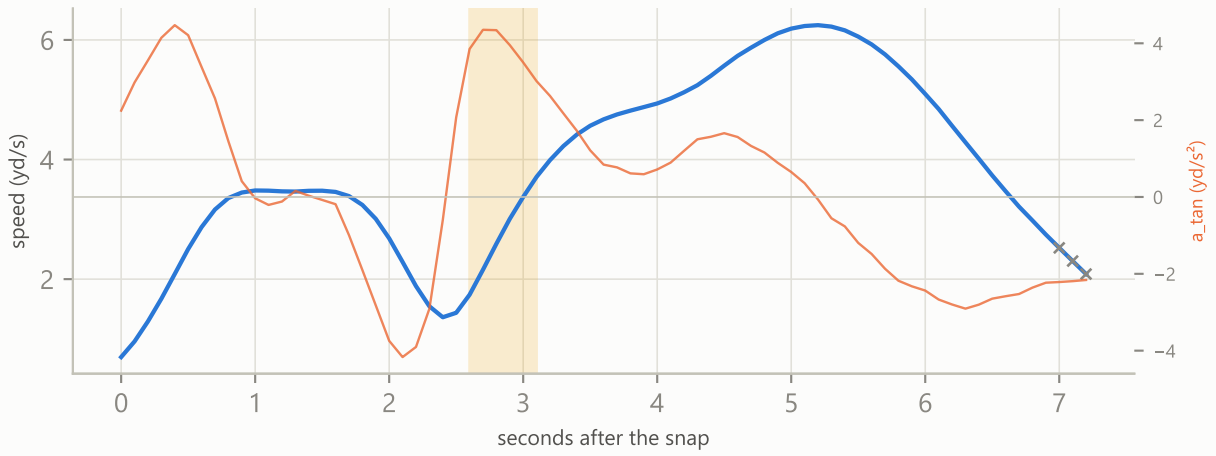

Cole Bishop · DB · game 2025101300, play 565
1.0 s sustained speed 7.49 yd/s (p90 of DB windows)

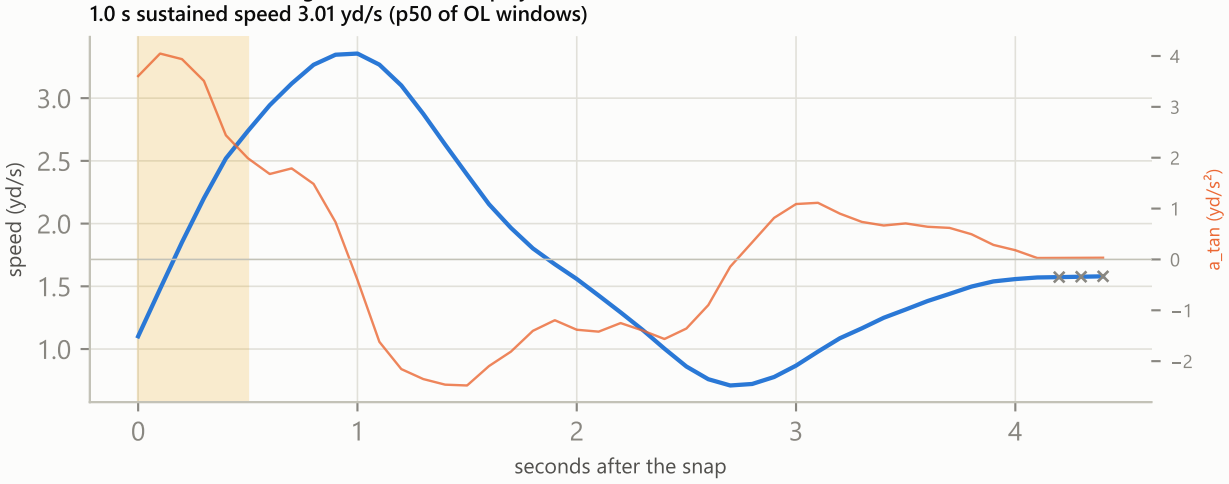

Darius Robinson · DL · game 2025091409, play 2586
1.0 s sustained speed 4.03 yd/s (p50 of DL windows)

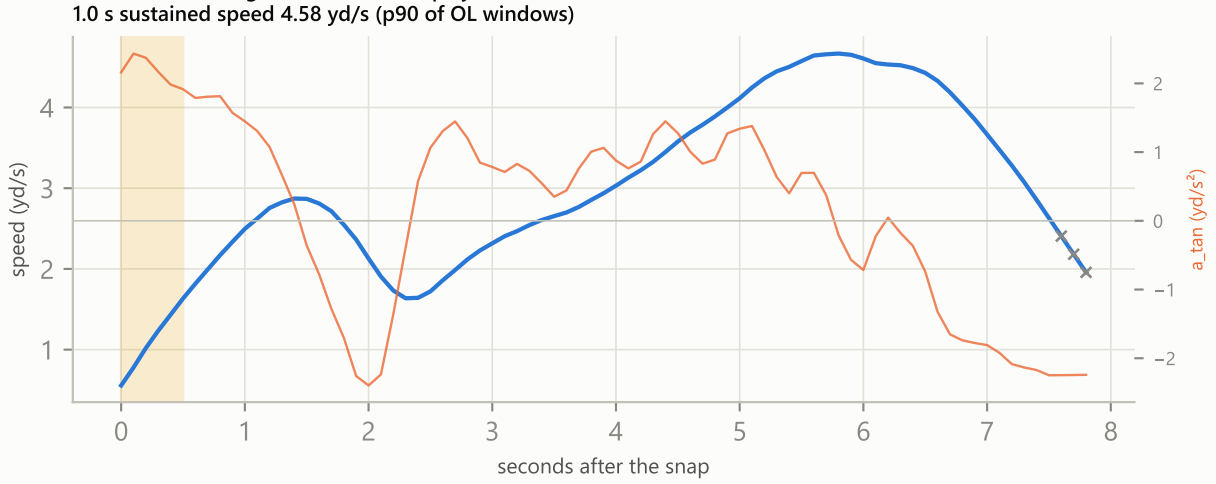

Jared Verse · DL · game 2025110909, play 1514
1.0 s sustained speed 6.07 yd/s (p90 of DL windows)

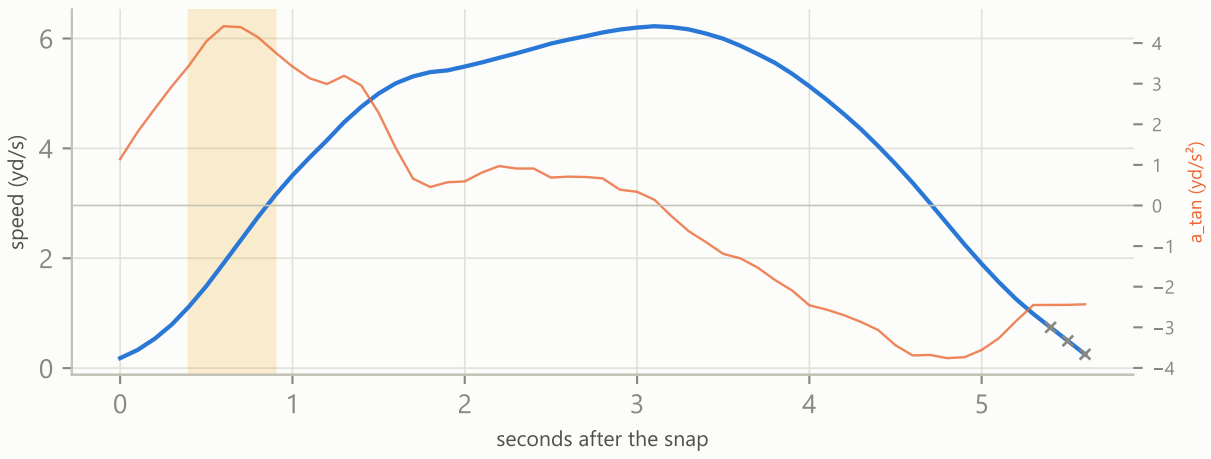

Broderick Jones · OL · game 2024120804, play 2733
1.0 s sustained speed 3.01 yd/s (p50 of OL windows)

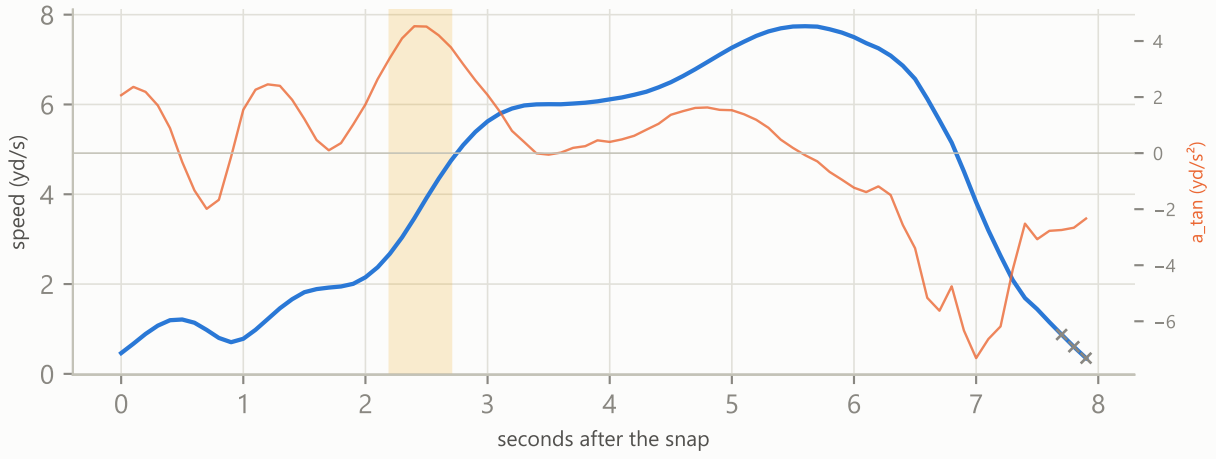

Patrick Paul · OL · game 2025091800, play 310
1.0 s sustained speed 4.58 yd/s (p90 of OL windows)

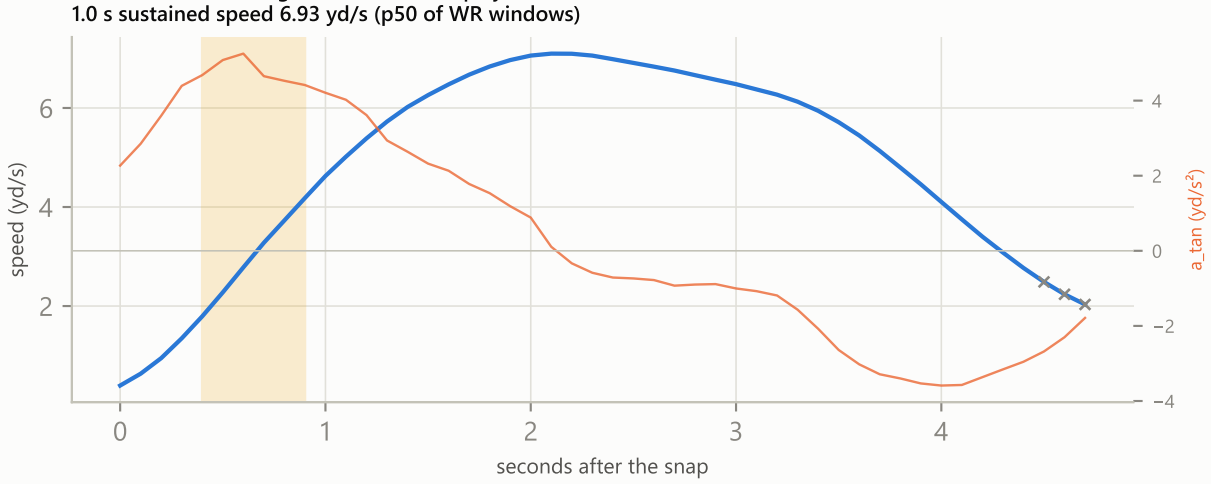

Theo Johnson · TE · game 2024102007, play 639
1.0 s sustained speed 6.10 yd/s (p50 of TE windows)

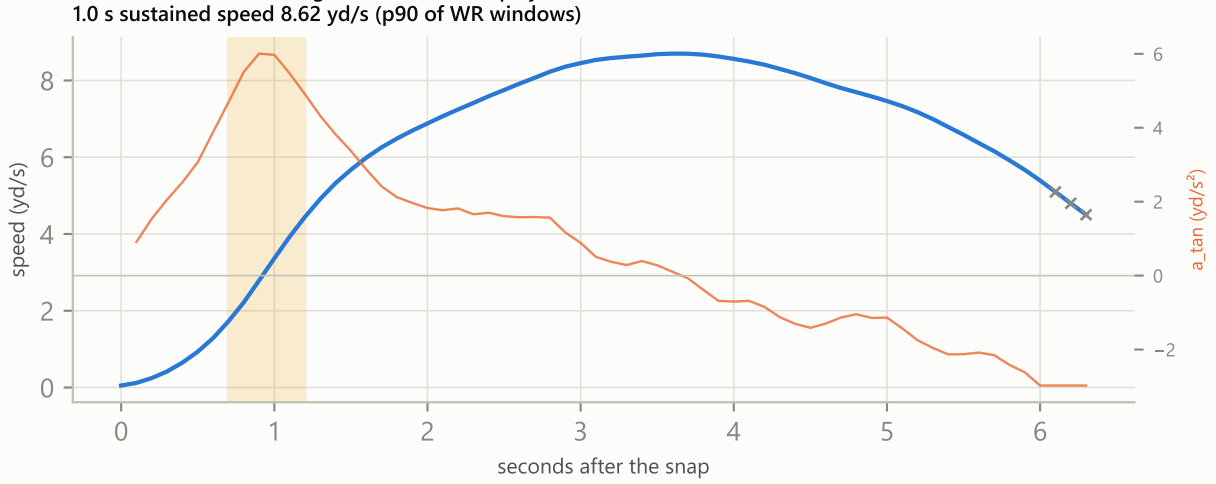

Tucker Kraft · TE · game 2024112408, play 3292
1.0 s sustained speed 7.60 yd/s (p90 of TE windows)

Cedric Tillman · WR · game 2025090701, play 2599
1.0 s sustained speed 6.93 yd/s (p50 of WR windows)

Quentin Johnston · WR · game 2024092910, play 3792
1.0 s sustained speed 8.62 yd/s (p90 of WR windows)

Each panel is ONE recorded player-play (real tracking, recomputed from the silver frames with the primary filter). Blue: derived speed; orange: tangential acceleration d|v|/dt (right axis); crosses: frames inside the filter boundary of their tracking segment; shaded: the 0.5 s window with the largest speed gain that is not a boundary window. Examples are chosen by rule (the window closest to a stated quantile of its position group), not by hand.
