Sensitivity of the athlete-level outcomes to smoothing, boundaries and quality filters

Unit: athlete. sg<window>p<order> and boundary_incl: the same windows under another filter or with filter-edge windows kept (subset of games). tier_A_only, in_player_play_only, post_snap_ge_3s, boundary_frac_le_0p2: the primary filter on the windows passing a quality rule. Reference line for the filter variants: rank agreement ≥ 0.9.
